## PROFILE

I graduated as a Bachelor of Software Engineering in 2015 and have continued my professional growth through self-study with books, attending courses and meetups. Currently, I specialize in backend development with a focus on PHP, while also being enthusiastic and experienced in frontend technologies. I consider myself a responsible, organized person, passionate about constant learning and pushing the boundaries of my work through practice.

## EXPERIENCE

2017 - 2024
